

07/30/18

To whom it may concern.

I am writing to recognize your generous support of \$5000.00., in the 2017-2018 grant year. DASA was able to use this funding to support our Veteran programs in Functional Fitness and Snow skiing. We surpassed our goal of 10 veterans to serve 15 or more each month throughout the grant year. These veterans worked diligently to improve their fitness level and overall health. Josh and three others competed in a 5K run in April. This was a goal the veterans and their trainers had set and they accomplished!

Without the support of The Kaufman Fund, disabled veterans and injured service members would not have the ability to participate in the weekly strength and fitness training offered by DASA or any other facility.

The purchase of adaptive snow ski equipment and modified fitness equipment really helped promote success for the veterans in their endeavors to be active in sport and fitness. More than 15 Veterans participated in four snow ski sessions with the help of adaptive and modified equipment.

Thank you again for your support.
